Projects

MediLab Healthcare Platform – AI Powered Healthcare Service

[Github](#) | [Live](#)

- Built an AI-driven system that recommends suitable doctors based on user-described health problems.
- Implemented secure doctor appointment booking with authentication and confirmation flow.
- Developed a blood search and booking feature allowing users to find blood by group, urgency, and availability.
- Integrated AI to enhance doctor discovery and support smarter healthcare decision-making.
- **Technologies:** Next.js, React, MongoDB, NextAuth, OpenAI API, GSAP, Recharts, bcrypt, SweetAlert2, JWT .

Career Mentor AI & Resume Analyzer

[Github](#) | [Live](#)

- Developed an AI-powered resume analysis system that provides instant structured feedback from uploaded PDF resumes.
- Generated detailed insights including resume score, strengths, weaknesses, improvement suggestions, missing sections, and ATS compatibility.
- Implemented personalized career recommendations based on resume content, skills, and experience.
- Built an AI chatbot to assist users with career guidance, skill development, and career transition planning.
- **Technologies:** Next.js, React, Google Generative AI (Gemini), OpenAI, MongoDB, NextAuth, GSAP, Tailwind CSS, Formidable, PDF Parsing, JWTT

Daily Price Tracker – Market Price Monitoring System

[Github](#) | [Live](#)

- Built a real-time price tracking system to monitor daily product price changes across multiple markets.
- Designed role-based dashboards for vendors, admins, and users to manage data efficiently.
- Implemented product comparison and watchlist features to support informed purchasing decisions.
- Integrated secure online payment functionality for product purchases.
- **Technologies:** React, Tailwind CSS, DaisyUI, React Router, Axios, React Query, React Hook Form, Stripe Payment, JWT

Courses

Completed Web development Course with Jhankar Mahabub

Programming Hero .

Language Proficiency

Bangla – Native | English – Fluent | Hindi – Proficient
